Any file in any format can be uploaded and downloaded for free. The cost of that data transfer is covered by your internet service or the data plan on yourphone. This is easy, fast and reliable filehosting! You don't need any kind of premium-accounts. filehosting provides an easy possibility for you to send largefiles to your friends. Files can be downloaded from any computer from our high speed servers. Keep your files private, or send your download links only tofriends or family. So try our free and simple filehosting service now. You can upload any type of file (movies, music, documents, images, zip files and more). Our service is completely free for everyone. File is free to use with no gotchas and no hidden fees. Your wallet will be none-the-lighter! Just so we're all 100% clear here: When you share a file, data is being transferred between your computer or phone and our servers, then from our servers to your friends device. Youdon't need any special software installed to be able to download your files. It is also allowed to link to the download page from websites and communities. Youcan give this download link to your friends by mail or instant messenger. Simply upload your file and share the link. When you use file, you avoid storing thefile you're sending in your cloud storage or mail server. You decide who you want to share your files with. Files transferred the old-fashioned way tend to pileup and be forgotten about, eventually costing you money in data storage fees. There are no restrictions on the number of times a file can be downloaded. Alternatively you can choose to share your download links on blogs, forums and social networking sites. Just upload the file you want to share with your friendsand we send you a download link to your file. If only we could, we surely would! On the other hand, using file can actually save you money. Unfortunately, wecan't make that part free. Why pay storage fees for a file that you just wanted to send to a friend or colleague? Also, many team chat apps have limits
