The design is flawed in that the hose is not easily replaceable, you have to buy the same hose from the mfr. This does NOT take standard air hoses, there is no threaded fitting on the hose reel. First, this doesnt come with a leader hose. Second, its made cheap compared to other reels. Third, it leaks air around the swivel on the reel, where the hose is attached. I doubt it last long in my, home, garage. If your choosing between this hose reel and another, go the other way. Customer service replaced it immediately, no questions asked. Hose a bit stiff. Serves my purposes just fine.

I like the way the whip hose connects to the frame the intergal hose connection to reel. Mounts easily, the reel turns smoothly, the cable is solid, and when you unroll it, it comes out nice and straight; it doesnt try to loop or coil back upon itself, like some hoses seem to. For those complaining that it doesnt come with a hose to connect to a compressor, well, its not like it claims that it does. Sure, it would have been nice if it came with a 35 foot connector hose. But if you have a compressor, you probably already have a hose that can be used to connect to this. This should be mentioned somewhere! Sorry, we failed to record your vote.
