Model-C100

The Melody

——— ULTRA LINEAR WILLIAMSON AMPLIFIER AND PREAMPLIFIER ———

INSTALLATION—OPERATION AND SERVICE INSTRUCTIONS

UNPACKING

After unpacking the Melody, inspect it carefully for any signs of damage in transit. Your unit was subjected to many inspections and tests, and then carefully packed. If any damage is visible, notify your dealer immediately. If the unit was shipped to you, notify the transportation company at once.

Check the contents of the package carefully. You should find:

1-Amplifier, Model C 100
1-Instruction booklet
1-Warranty card

It is strongly urged that the warranty card be completed and mailed without delay, to protect your rights under the warranty. If you should require repair service or information on the use of the Melody, we will be able to identify your unit immediately, and respond quickly.

VENTILATION

All electrical equipment generates heat which must be allowed to escape. Although the Melody is well ventilated in itself, sufficient space should be allowed around it to permit free air flow. If it is placed in a bookcase, it should be located well toward the front, to provide as much clearance as possible at the rear.

Do not put books or other objects on top of the Melody. Covering the perforated tube grill will reduce the ventilation and result in sharply reduced component and tube life.

SPEAKER CONNECTIONS

Provision has been made to connect to any of today's fine speaker systems. A three-screw terminal strip marked "SPEAKER" is located on the rear of the chassis. The terminals are identified as "G", "8", and "16". The generous use of inverse feedback in the design of the Melody permits the connection of practically any speaker between either the "G" and "8" terminals or the "G" and "16" terminals with negligible difference in results. For optimum results and maximum damping factor, it is suggested that speaker systems with a rated impedance between 4 and 12 ohms be connected between "G" and "8". Speaker systems with a rated impedance between 12 and 24 ohms should be connected between "G" and "16". Speaker systems with a rated impedance lower than four ohms should be connected between "8" and "16", no connection being made from the speaker to "G" or ground.

HARMAN - KARDON, INC.   520 MAIN STREET, WESTBURY, L. I., N. Y.

Never block the air openings of the unit with materials such as clothing, plastic bags or papers, or place it on a soft surface such as a bed or couch, where the air openings may be blocked. 9. Do not overload the electrical outlet. Use the power source only as indicated. 10. Do not carry this unit by its cord or use the cord as a handle. 11. Never operate this unit if it has a damaged cord or plug, if it is not working properly, or if it has been dropped or damaged, or dropped into water. FC C I N FOR MA TION Caution Changes or modifications not expressly approved by the party responsible for compliance could void the user' s authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B Digital Device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. This equipment complies with Part 15 of the FC C Rules. Operation is subject to the following two conditions 1. This device may not cause harmful interference, and; 2. This device must accept any interference received, including interference that may cause undesired operation. Modifications not authorized by the manufacturer may void the user' s authority to operate this device. FCC Radiation Exposure St atement This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your b ody.It may take up to a minute for the Big Blue 100 to appear as an available device.

Important The Big Blue 100 will automatically appear as an available device in the Google Home app. Do not select " Add New Device" in the app. 9. F ollow instructions in app to complete setup. The setup process may take several minutes. During set up, the WIFI ST A TUS LE D I N DI CA T O R may turn off for several seconds, this is normal. 10. If a defect arises and a valid claim is received within the W arranty P eriod, at its option, Brookstone will either 1 repair the defect at no charge, using new or refurbished replacement parts, or 2 replace the product with a new product that is at least functionally equivalent to the original product, or 3 provide a store credit in the amount of the purchase price of the original product. A replacement product or part, including a userinstallable part installed in accordance with instructions provided by Brookstone, assumes the remaining warranty of the original product. When a product or part is exchanged, any replacement item becomes your property and the replaced item becomes Brookstone' s property. W hen a store credit is given, the original product must be returned to Brookstone and becomes Brookstone' s property.

Obtaining Service T o obtain warranty service, call Brookstone Limited W arranty Service at

18002929819. Please be prepared to describe the product that needs service and the nature of the problem. A purchase receipt is required. All repairs and replacements must be authorized in advance. Service options, parts availability and response times will vary. Y ou are responsible for delivery and the cost of delivery of the product or any parts to the authorized service center for replacement, per our instructions. Limits and Exclusions Coverage under this Limited W arranty is limited to the United States of America, including the District of Columbia and the U.S. T erritories of Guam, Puerto Rico, and the U.S. Virgin Islands. This Limited W arranty applies only to products manufactured for Brookstone that can be identified by the "Brookstone" trademark, trade name, or logo affixed to them or their packaging. The Limited W arranty does not apply to any nonBrookstone products. They feature Adirondack tops and bracing, no tongue brace, and enlarged soundholes. This results in excellent overall tonal balance. Tonally it is at home in a variety of styles from jazz to rockabilly. With a thin body depth and floating Lollar pickup, the CL Jazz has exceptional tonal focus and acoustical response. A glossy nitrocellulose lacquer finish and Adirondack top impart exceptional resposiveness and tone. A glossy nitrocellulose lacquer finish and Adirondack top impart exceptional resposiveness and tone. With a handetched inlay and engraved taipiece, this is our flagship mandolin. Although its the same width and depth as the OM, the longer body typically produces more bass and overall volume. This makes the Collings 000 ideal for stringband purists or any guitarist who wants a maximum of power from an instrument of comfortable size with an elegant, oldtime appearance. Along with the usual options in woods, binding, and inlay, it is also available with a graceful cutaway.

Premium Tonewoods Each Collings acoustic guitar, from our most affordable model to the highest end, are built with the finest tonewoods available. Each wood is acquired, acclimated, and hand selected by master luthiers here at our shop who pick each component with the whole tonality of the end instrument in mind. Playability A combination of exacting PLEK machine leveling and hand fret dressing ensures consistently excellent playability and a silky fret feel. Finish By meticulously handsanding between coats, our nitrocellulose lacquer finishes measure between.005 and.007 inches in final thickness, maximizing acoustical response while providing excellent protection and aesthetics. Precision Tuning Premium Waverly opengear tuners offer exceptional tuning stability and smooth reliable operation with a vintage aesthetic. Appointments Herringbone purflings with ivoroid body bindings are a distinctive feature of our 2style acoustics. A matching ivoroid and wood fiber rosette complete the traditional aesthetic. Make It Your Own With a wide variety of custom inlays, nut widths, neck profiles, and tone wood options; a Collings instrument can be configured to perfectly match your playing style and aesthetic preference. Madagascar Rosewood Wenge Walnut European Maple European maple is a beautiful figured wood that offers excellent projection and focus, which made it the tonewood of choice for many luthiers before the days of amplification. Its still a very valid tonewood today, and despite the misconception that maple guitars are overly bright, properly selected maple sets can produce deep, full sound with excellent articulation and clarity. Koa With its vibrant amber color and striking figure, Koa is a wonderful tonewood that has been used for stringed instruments for generations. Tonally, Koa finds a pleasing balance between warmth and clarity with a bright frontend attack and warm undertones, making it an ideal choice for fingerstyle and chord melodies.
