Con Pages puedes crear documentos asombrosos casi sin esfuerzo. Elige una de nuestras plantillas y añádele lo que quieras: imágenes, vídeos, figuras o gráficas. Si hay que definirlo en una palabra, tenlo claro, es «facilísimo». Más información sobre Pages Hay vida más allá de las filas y las columnas. Por eso Numbers empieza siempre con una página en blanco en vez de una cuadrícula interminable. Incluye gráficas, tablas, imágenes y Categorías Inteligentes, y deja que tus números hablen por sí solos con las tablas de pivotación. Más información sobre Numbers Keynote te permite crear presentaciones brutales, con o sin tu equipo. Tú solo preocúpate de pensar cómo será tu presentación y, gracias a las herramientas gráficas de las que dispones, podrás hacer realidad tus ideas con transiciones de película. Más información sobre Keynote Análisis SoftónicoCloud es el cliente para Windows del servicio de almacenamiento online de Apple. Consta de un panel de configuración que permite gestionar la sincronización de contenidos guardados online en cuentas de iCloud entre dispositivos Apple y un PC. Sincroniza datos entre tus dispositivos Con iCloud para Windows, los usuarios de iPhone, iPad o iPod touch pueden mantener fácilmente actualizados su correo electrónico, contactos y calendarios entre sus dispositivos Apple y un PC. El programa propone opciones para sincronizar los favoritos de los navegadores Explorer, Firefox y Google Chrome de Windows con los favoritos de Safari en Phone, iPad, iPod touch y Mac. iCloud descarga automáticamente las fotos tomadas con cualquier dispositivo de los mencionados anteriormente para que puedas abrirlos en el ordenador. Lo mismo en el sentido inverso: cada vez que se añadan fotos a la carpeta iCloud Photos (disponible dentro del Explorador de archivos tras instalar iCloud) se sincronizan automáticamente con todos los dispositivos Apple. Hay también algunas opciones para compartir las fotos y vídeos con las personas que quieras. Esas personas también pueden añadir sus propias fotos, vídeos y comentarios. Integración con el Explorador de Windows Para usar iCloud es necesario disponer de uno de los dispositivos móviles de Apple y una identificación Apple. La configuración del programa se realiza sin esfuerzo y el usuario solo tiene que elegir qué contenidos sincronizar. A menos que se se quieran cambiar las opciones de sincronización, todo pasa al Explorador de archivos de Windows. iCloud se integra mediante dos carpetas (iCloud Photos y iCloud Drive), accesibles desde favoritos. Añadir archivos para enviarlos a iCloud se realiza simplemente copiando y pegando los archivos en esas carpetas. Util para encontrar tus datos en cualquier lugar iCloud resulta muy práctico para sincronizar y recuperar tus datos en varios dispositivos. La configuración es facilísima y la integración con el Explorador de archivos de Windows simplifica enormemente la gestión de archivos. Panel de configuración simple de manejar La integración con el Explorador de Windows facilita la gestión de datos Espacio de almacenamiento limitado El servicio ha experimentado fallos de seguridad 1 Click the Apple menu. It's at the top-left corner of the screen. 2 Click System Preferences. If you sync photos and back up files to iCloud, you don't have to restrict yourself to using Apple's cloud storage service on an iPhone or Mac. With iCloud for Windows, you can seamlessly work with services such as iCloud Photos and Drive on a Windows PC, and even sync stuff such as your mail, contacts, and bookmarks. Let's check out what you must do to download, set up, and use iCloud for Windows on the PC. How to Download and Install iCloud for Windows iCloud for Windows is available as a free download from the Apple website. If you want to skip using a traditional installer, you can opt for the Microsoft Store version since it's faster to install and easier to update. After installing iCloud for Windows, sign in with your Apple ID or iCloud credentials. If you've set up two-factor authentication, tap Allow on any of your Apple devices and enter the six-digit code you see into your PC. The iCloud app should then open automatically. You may be prompted to enter your passcode or use Touch ID to create your account. Once the process is complete, your iCloud email will be ready to use. [3] 6 Download and install iCloud for Windows. If you haven't yet installed the application, go to and click Download to do so now. Once the download is complete, double-click the downloaded file to complete the setup process. 7 Open iCloud. You'll find it in the Windows/Start menu in the iCloud folder. 8 Enter your Apple ID and password and click Sign In. Once your account information is accepted, you'll see your iCloud home screen. 9 Check the box next to "Mail, Contacts, Calendars, and Tasks." Once selected, your iCloud email will appear as a folder in your Windows email client, such as Outlook or Windows Mail. Advertisement Ask a Question Advertisement Written by Nicole Levine, MFA. This article has been viewed 93,789 times. Co-authors: 7 Updated: February 16, 2022 Views: 93,789 Categories: iCloud You must use it to manage your iCloud services. If you close it, you can bring it up by selecting the iCloud shortcut on the system tray or the Start menu. You'll see the following options within iCloud for Windows: iCloud Drive: Syncs files and documents in iCloud Drive. Photos: Syncs photos, videos, and shared albums in iCloud Photos with your PC. Mail, Contacts, and Calendars: Syncs mail, contacts, and calendars. You won't see this option if you don't have Microsoft Outlook installed on your PC. Bookmarks: Syncs bookmarks with Google Chrome and Mozilla Firefox. Passwords: Inserts passwords stored on iCloud Keychain into Google Chrome. Additionally, you should see a storage indicator displaying the status of your iCloud storage, along with an option to manage it. How to Sync Files With iCloud Drive on Windows iCloud for Windows allows you to sync files stored on iCloud Drive with your PC. Just check the box next to the iCloud Drive option on the iCloud app and select Apply to activate Apple's cloud-storage service on Windows. To access iCloud Drive, select the iCloud icon within the system tray and pick the Open iCloud Drive option. Or, open File Explorer and select iCloud Drive on the sidebar. You should now see the files that you've already stored in iCloud Drive. You can move items around or delete them, and any items that you paste into the directory should copy over to your Apple devices. iCloud Drive also supports Files On-Demand functionality, which helps conserve disk space by downloading files only when you access them. You can choose to download an item manually or offload it from local storage by right-clicking and selecting the Always keep on this device or Free up space options. It's also possible to share iCloud Drive files and folders with others. Just right-click an item, select Share with iCloud Drive, and specify the contacts and permissions. How to Sync Photos With iCloud Photos on Windows iCloud Photos serves two purposes. First, it syncs photos from an iPhone or Mac between devices. And second, it works as a vital backup function. With iCloud for Windows, you can bring this functionality to your PC. Start by checking the box next to Photos next to the iCloud app. You can also select the Options button and activate Shared Albums as well. Finally, select Apply to start activating iCloud Photos. The iCloud app should begin downloading photos to your PC immediately. You can access and view your photos library in iCloud Photos with others. Just right-click an item, select Share with iCloud Photos on the system tray. Or, open File Explorer and select iCloud Photos on the sidebar. Any photos you paste to that folder should upload to iCloud Drive and sync over to Apple devices such as your iPhone or Mac. If you have Microsoft Outlook installed on your Windows machine, you can choose to sync your mail, contacts, and calendars from iCloud with your PC. Start by checking the box next to Mail, Contacts, and Calendars in the iCloud app. Then, select iCloud in the folder pane on the Outlook sidebar to access your mail, contacts, and calendars stored in iCloud. How to Auto-Fill iCloud Keychain

Passwords on Windows If you use Google Chrome on Windows, you can use iCloud for Windows to auto-fill passwords that you've stored in iCloud Keychain. On the iCloud app, check the box next to Passwords and select Apply. Follow that by installing the iCloud Passwords extension in Chrome. Whenever you access a login portal containing passwords stored in iCloud Keychain, the iCloud Passwords icon next to Chrome's address bar should turn blue. Select it to fill them into the form. You can also store new passwords in iCloud Keychain, but you won't be able to save or sync anything to Chrome's built-in password manager. Passwords aside, iCloud for Windows also lets you sync bookmarks that you've created in Safari with Chrome and Firefox, and vice-versa. Just enable the Bookmarks option within the iCloud app and follow by installing the iCloud Bookmarks extension from the Chrome Web Store or the Firefox Add-ons Store. How to Manage iCloud Storage on Windows: The iCloud for Windows app displays the amount of used and remaining storage visually. If it seems as if you're close to running out of storage, select the Storage button next to the indicator to bring up a list of data types that occupy storage in iCloud. You can then choose to delete obsolete iPhone backups or app-related data you no longer use. As you just saw, you can easily take advantage of multiple iCloud services on your Windows PC. However, the latest versions of iCloud for Windows also come with numerous bug fixes, performance enhancements, and feature additions. So, it's a good idea to keep the app up-to-date. If you downloaded and installed iCloud for Windows off the Apple website, use the Apple Software Update utility (which you can access via the Start menu) to apply pending updates. If you use the Microsoft Store version, it should update automatically. But if you've disabled automatic Microsoft Store updates, you must update iCloud for Windows manually.
